

## Post-Test

Name: \_\_\_\_\_

Date: \_\_\_\_\_

*Instructions: After reviewing the Organ and Tissue Donor Referral Process video, answer the questions below.*

1. The federal government mandates that all hospitals refer all imminent deaths according to clinical triggers to their designated organ procurement organization and all deaths to their tissue organizations.
  - A. True
  - B. False
  
2. In the event a patient meets the criteria for referral, it is required to make a referral call to the organ procurement organization even if \_\_\_\_\_.
  - A. The patient has HIV.
  - B. The patient has metastatic lung cancer.
  - C. The patient has Hepatitis C.
  - D. The patient is 96 years old.
  - E. All of the above
  
3. As defined by LifeQuest, a timely referral is within \_\_\_\_\_ minutes of meeting any one of the specific clinical triggers for organ donation.
  - A. 30
  - B. 45
  - C. 60
  - D. 90
  
4. If a patient is listed in the computerized state registry (e.g. the patient has either checked yes on their driver license or is registered under the state site: [www.donatelifeflorida.org](http://www.donatelifeflorida.org)), this is considered first-person consent that would be honored in a court of law.
  - A. True
  - B. False
  
5. If the patient has already been referred for potential organ donation after meeting a clinical trigger, a second referral call for tissue and eye donation must occur after circulatory death.
  - A. True
  - B. False

## (Answer Key) Post-Test

1. The federal government mandates that all hospitals refer all imminent deaths according to clinical triggers to their designated organ procurement organization and all deaths to their tissue organizations. A. True
  
2. In the event a patient meets the criteria for referral, it is required to make a referral call to the organ procurement organization even if \_\_\_\_\_. E. All of the above
  - The patient has HIV.
  - The patient has metastatic lung cancer.
  - The patient has Hepatitis C.
  - The patient is 96 years old.
  
3. As defined by LifeQuest, a timely referral is within \_\_\_\_\_ minutes of meeting any one of the specific clinical triggers for organ donation. D. 60
  
4. If a patient is listed in the computerized state registry (e.g. the patient has either checked yes on their driver's license or is registered under the state site: [www.donatelifeflorida.org](http://www.donatelifeflorida.org)), this is considered first-person consent that would be honored in a court of law. A. True
  
5. If the patient has already been referred for potential organ donation after meeting a clinical trigger, a second referral call for tissue and eye donation must occur after circulatory death. A. True
