

# **Matrion**®

Applied by Physicians and Other Qualified Healthcare Professionals (QHPs)

## 2022 CODING AND PAYMENT INFORMATION

## **Applications Codes:**

Physicians and other QHPs should select the application codes based on the anatomic location and the wound surface area to which Matrion Placental Membrane is applied. Do not select the application code based upon the size of the product purchased.

CPT¹ Code	Wound Surface Area Less Than 100 Sq. CM
15271	Application of skin substitute graft to trunk, arms, legs, total wound surface area up to 100 sq. cm; first 25 sq. cm or less wound surface area
+15272	Each additional 25 cm² wound surface area or part thereof
15273	Application of skin substitute graft to trunk, arms, legs, total wound surface area greater than or equal to 100 sq. cm; first 100 sq. cm wound surface area, or 1% of body area of infants and children
+15274	Each additional 100 cm <sup>2</sup> wound surface area, or part thereof, or each additional 1% of body area of infants and children
CPT Code	Wound Surface Area Equal to or Greater Than 100 Sq.
15275	Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area up to 100 sq. cm; first 25 sq. cm or less wound surface area
+15276	Each additional 25 cm² wound surface area or part thereof
15277	Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area greater than or equal to 100 sq. cm; first 100 sq. cm wound surface area, or 1% of body area of infants and children
+15278	Each additional 100 cm <sup>2</sup> wound surface area, or part thereof, or each additional 1% of body area of infants and children)

The above table illustrates potential CPT codes that can be used to denote surgical skin procedures and the application of Matrion for the management of wounds.

• When applying the product, during the same encounter, to multiple wounds represented by the same application code, sum the surface areas of the wounds together.

#### **Examples:**

- 1. If the product is applied to a 5 sq. cm wound on the left foot and to a 10 sq. cm wound on the right foot, report 1 unit of 15275.
- 2. If the product is applied to a 15 sq. cm wound on the right leg and to a 20 sq. cm on the left leg, report 1 unit of 15277 and 1 unit of 15278.
- When applying the product, during the same encounter, to multiple wounds represented by different application codes, separately sum the surface areas of the wounds represented by each application code.

#### **Examples:**

- 1. If the product is applied to a 20 sq. cm wound on the right leg, a 15 sq. cm wound on the left leg, and a 10 sq. cm on the right foot, report 1 unit of 15271, 1 unit of 15272, and 1 unit of 15275.
- 2. If the product is applied to one large wound that is on the heel (30 sq. cm) and extends into the ankle (40 sq. cm), report 1 unit of 15275 and 1 unit of 15276 for the application to the heel and 1 unit of 15271 and 1 unit of 15272 for the application to the ankle.

**CAUTION:** For coding purposes, the wrists are part of the arms and the ankles are part of the legs.

NOTE: For wound surface areas less than 100 sq. cm, the maximum number of add-on codes that can be reported is 3.

NOTE: If the wound surface area is exactly 100 sq. cm, 15273 or 15277 should be reported.

**NOTE:** For wound surface areas greater than 100 sq. cm, report either 1 unit of 15273 with the appropriate number of units of 15274, or 1 unit of 15277 with the appropriate number of units of 15278.

#### **Product Code:**

When physicians and other QHPs purchase Matrion Placental Membrane and apply it in their offices, when it is covered, they should also report the appropriate HCPCS code for product, along with the appropriate modifiers.

HCPCS Coding Pathway Options						
HCPCS Code <sup>2</sup>	HCPCS Code Description					
Q4201	Matrion, per square centimeter					

**NOTE:** Physician/QHP offices should verify if the payer covers Matrion and whether they pay for it based on wholesale acquisition cost (WAC) or invoice price.

- If the payer bases payment for Matrion on WAC, the following information should be included in field 19 of a paper claim or in the narrative field of an electronic claim:
  - ♦ Product name
  - ♦ NDC or UPC code
  - ♦ WAC of product
  - ♦ WAC per sq. cm
  - ♦ Source of the WAC (e.g. Red Book)

- If the payer bases payment for Matrion on invoice price, the following information should be included in field 19 of a paper claim or in the narrative field of an electronic claim:
  - ♦ Product name
  - ♦ Product size (in sq.cn)
  - Product number
  - ⋄ Invoice price per piece
  - ♦ Shipping cost

**CAUTION:** Some payers only require the total product invoice cost for a specific patient in the following format (including cents): **INV. \$00.00.** 

#### **Product Code Modifiers:**

- If the physician/QHP applies (as a graft, not an implant) the entire piece to a patient, for whom the product was purchased by the office, the physician/QHP should report Q4201JC and the total number of sq. cm purchased.
- If the physician/QHP discards a portion of the product purchased by the office for the patient, the physician/QHP should append the JW modifier to the portion of the product code that was discarded.

#### **Example:**

1. If 20 sq. cm of the product were purchased by the office for the patient and 15 sq. cm were applied as a graft and 5 sq. cm were discarded, the physician/QHP should report the product code on two claim lines: Q4201JC with 15 units on the first claim line, and Q4201JW with 5 units on the second claim line.

CPT/HCPCS Modifier Options						
Modifier	Description					
-JC	Skin Substitute Used as Graft.					
-JW	Drug Amount Discarded/Not Administered to Any Patient. Used to report wastage when payor guidelines require separate reporting.

#### Disclaimer:

This information is for educational/informational purposes only and should not be construed as authoritative. The information presented here is current as of January 2020 and is based upon publicly available source information. Codes and values are subject to frequent change without notice. The entity billing Medicare and/or third-party payers is solely responsible for the accuracy of the codes assigned to the services or items in the medical record. When making coding decisions, we encourage you to seek input from the AMA, relevant medical societies, CMS, your local Medicare Administrative Contractor, and other health plans to which you submit claims. Items and services that are billed to payors must be medically necessary and supported by appropriate documentation. It is important to remember that while a code may exist describing certain procedures and/or technologies, it does not guarantee coverage and payment by payers.
