

# Matrion

Applied by Physicians and Other Qualified Healthcare Professionals (QHPs)

## 2023 CODING AND PAYMENT INFORMATION

### Applications Codes:

Physicians and other QHPs should select the application codes based on the anatomic location and the wound surface area to which Matrion Placental Membrane is applied. Do not select the application code based upon the size of the product purchased.

CPT <sup>1</sup> Code	Wound Surface Area Less Than 100 Sq. CM
15271	Application of skin substitute graft to trunk, arms, legs, total wound surface area up to 100 sq. cm; first 25 sq. cm or less wound surface area
+15272	Each additional 25 cm <sup>2</sup> wound surface area or part thereof
15273	Application of skin substitute graft to trunk, arms, legs, total wound surface area greater than or equal to 100 sq. cm; first 100 sq. cm wound surface area, or 1% of body area of infants and children
+15274	Each additional 100 cm <sup>2</sup> wound surface area, or part thereof, or each additional 1% of body area of infants and children
CPT Code	Wound Surface Area Equal to or Greater Than 100 Sq.
15275	Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area up to 100 sq. cm; first 25 sq. cm or less wound surface area
+15276	Each additional 25 cm <sup>2</sup> wound surface area or part thereof
15277	Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area greater than or equal to 100 sq. cm; first 100 sq. cm wound surface area, or 1% of body area of infants and children
+15278	Each additional 100 cm <sup>2</sup> wound surface area, or part thereof, or each additional 1% of body area of infants and children)

The above table illustrates potential CPT codes that can be used to denote surgical skin procedures and the application of Matrion for the management of wounds.

- When applying the product, during the same encounter, to multiple wounds represented by the same application code, sum the surface areas of the wounds together.

**Examples:**

- If the product is applied to a 5 sq. cm wound on the left foot and to a 10 sq. cm wound on the right foot, report 1 unit of 15275.
- If the product is applied to a 15 sq. cm wound on the right leg and to a 20 sq. cm on the left leg, report 1 unit of 15277 and 1 unit of 15278.

- When applying the product, during the same encounter, to multiple wounds represented by different application codes, separately sum the surface areas of the wounds represented by each application code.

**Examples:**

- If the product is applied to a 20 sq. cm wound on the right leg, a 15 sq. cm wound on the left leg, and a 10 sq. cm on the right foot, report 1 unit of 15271, 1 unit of 15272, and 1 unit of 15275.
- If the product is applied to one large wound that is on the heel (30 sq. cm) and extends into the ankle (40 sq. cm), report 1 unit of 15275 and 1 unit of 15276 for the application to the heel and 1 unit of 15271 and 1 unit of 15272 for the application to the ankle.

**CAUTION:** For coding purposes, the wrists are part of the arms and the ankles are part of the legs.

**NOTE:** For wound surface areas less than 100 sq. cm, the maximum number of add-on codes that can be reported is 3.

**NOTE:** If the wound surface area is exactly 100 sq. cm, 15273 or 15277 should be reported.

**NOTE:** For wound surface areas greater than 100 sq. cm, report either 1 unit of 15273 with the appropriate number of units of 15274, or 1 unit of 15277 with the appropriate number of units of 15278.

## Product Code:

When physicians and other QHPs purchase Matrion Placental Membrane and apply it in their offices, when it is covered, they should also report the appropriate HCPCS code for product, along with the appropriate modifiers.

HCPCS Coding Pathway Options		
HCPCS Code <sup>2</sup>	HCPCS Code Description	ASP as of January 1, 2023*
Q4201	Matrion, per square centimeter	\$170.263

\* Please note that ASP is updated on a quarterly basis by CMS. The most current ASP can be downloaded at [2023 ASP Drug Pricing Files](#)

## Product Code Modifiers:

- The -JC modifier was established to report use of a skin substitutes as a graft (not an implant). Each Medicare contractor may issue its own directions for the use of the -JC modifier and providers should check with their local MAC to determine reporting requirements.
- The -JW modifier is required to be reported on a claim to report the amount of drug that is discarded and eligible for separate payment. The modifier should only be used for claims that bill single-dose container drugs.
- Effective July 1, 2023, providers and suppliers are required to report the -JZ modifier on all claims that bill for drugs from single-dose containers that are separately payable under Medicare Part B when there are no discarded amounts. Providers may begin using the modifier voluntarily January 1, 2023.

### Examples:

1. Partial Use of a Graft: If 20 sq. cm of the product were purchased by the office for the patient and 15 sq. cm were applied as a graft and 5 sq. cm were discarded, the physician/QHP should report the product code on two claim lines: Q4201 with 15 units on the first claim line, and Q4201-JW with 5 units on the second claim line.
  2. Entire Piece Graft is Used: If 20 sq. cm of the product were purchased by the office for the patient and 20 sq. cm were applied as a graft, the physician/QHP should report Q4201-JZ with 20 units reported on the claim line.
- For additional information regarding use of the -JW and -JZ modifier, please refer to the following resource: [Discarded Drugs and Biologicals – JW Modifier and JZ Modifier Policy Frequently Asked Questions](#)

CPT/HCPCS Modifier Options	
Modifier	Description
-JC	Skin Substitute Used as Graft.
-JW	Drug Amount Discarded/Not Administered to Any Patient. Used to report wastage when payor guidelines require separate reporting.
-JZ	Zero drug wasted

OR SUPPLIER INFORMATION

**Field 24B**  
Enter appropriate code indicating where service was provided.

**Field 24D**  
Enter applicable HCPCS/CPT codes and modifiers. Check directly with the payer to determine specific modifier requirements.

**Field 24E**  
Enter diagnosis code(s) corresponding with code(s) in Field 21.

**Field 24G**  
Enter appropriate number of units for each service provided. Matrion Wound is billed per sq. cm. (this is an example, sizes vary)  
20mm = 3 units  
2x3cm = 6 units  
3x4cm = 12 units  
5x5cm = 25 units

24. A DATE(S) OF SERVICE To B Place of Service C Type of Service D PROCEDURES, SERVICES, OR SUPPLIES (Explain Unusual Circumstances) E DIAGNOSIS CODE F \$ CHARGES G DAYS OR UNITS H EPSDT Family Plan I EMG J COB K RESERVED FOR LOCAL USE

### **Disclaimer:**

This information is for educational/informational purposes only and should not be construed as authoritative. The information presented here is current as of January 2020 and is based upon publicly available source information. Codes and values are subject to frequent change without notice. The entity billing Medicare and/or third-party payers is solely responsible for the accuracy of the codes assigned to the services or items in the medical record. When making coding decisions, we encourage you to seek input from the AMA, relevant medical societies, CMS, your local Medicare Administrative Contractor, and other health plans to which you submit claims. Items and services that are billed to payors must be medically necessary and supported by appropriate documentation. It is important to remember that while a code may exist describing certain procedures and/or technologies, it does not guarantee coverage and payment by payers.
