Matrion[®]

2023 MEDICARE CODING AND PAYMENT

Information on Matrion

Technology Description:

Matrion is the first decellularized, full-thickness placental membrane designed to act as a protective barrier to support wound healing. Unlike traditional single- or bi-layer placental membranes, Matrion includes the complete trophoblast layer that is up to four times thicker than the amniotic or chorionic membranes alone and includes the majority of native biologic factors of the placenta. In addition, Matrion's unique thickness also provides a robust natural barrier that may help prevent bacterial ingress and inflammation associated with infection. Matrion does not fold in on itself when rehydrated, making it less likely to migrate away from its intended site of application.

Purpose:

Matrion is a technologically advanced human decellularized placental membrane.

Device Description:

Matrion is ready to use out of the package and stored at room temperature, eliminating the need for refrigeration and rehydrating processes. As a final step, all Matrion grafts are Sterilized to a Sterility Assurance Level (SAL) of 10^{-6} , medical device grade sterility.³

Indications:

- Matrion is indicated for Chronic Wounds* including:
- Diabetic foot ulcers (DFUs)
- Venous stasis ulcers (VSUs)
- Arterial ulcers
- Pressure ulcers
- Dehisced surgical wounds
- Traumatic burns

* *Matrion can be used over exposed tendon, bone, joint capsule, and muscle*

Matrion is regulated by the U.S. Food and Drug Administration

(FDA) as a human skin tissue under its Human Cells, Tissues and Tissue-Based Products (HCT/P) guidelines, subject to Section 361 of the Public Health Service Act and 21 CFR 1270 and 1271.

Important Note:

Physicians report their surgical work, with CPT codes, separately to payors. CPT[®] codes are assigned to report the actual procedure performed and documented in the medical record. The code options below may or may not represent the actual procedure performed and are presented here as options only.

Coding for Matrion

Submitting accurate codes to describe a patient's medical condition and to report clinical procedures is essential to ensuring successful claims processing and appropriate payment. Inaccurate or incomplete coding may increase the likelihood of delayed payment or incorrect payment amounts.

The choice of codes must be made by the surgeon as documented in the medical record. We strongly advise that the provider review specific payor guidelines for reporting of procedures when making coding decisions. We encourage you to seek input from the AMA, relevant medical societies, CMS, your local Medicare Administrative Contractor, and other health plans to which you submit claims.

While these options are intended to provide context for procedure and related coding, providers should select the procedure, diagnosis, and technology coding that best represents each patient's medical condition and treatment.

The provider is ultimately responsible for the determination of medical necessity and selection of the appropriate code that accurately describes the service provided to a patient based on patient's medical condition.

ICD-10-CM Diagnosis Codes

All healthcare providers are responsible for reporting the appropriate ICD-10-CM diagnosis code that describes the patient's condition and should consult with a current version of the ICD-10-CM code book. The relevant diagnosis codes for medical conditions associated with chronic wounds where grafting is applicable are listed below:

ICD-10-CM Codes	Diagnosis Description	ICD-10-CM Codes	Diagnosis Description

Information provided is gathered from third-party sources and is subject to change without notice due to frequently changing laws, rules, and regulations. The provider has the sole responsibility to determine medical necessity and to submit appropriate codes and charges that accurately describe the service provided to a patient based on a patient's medical condition. Providers should follow payer specific billing and coding requirements and contact the payer if they have questions. LifeNet Health makes no guarantee that the use of this information will prevent differences of opinion or disputes with Medicare or other payers as to the correct form of billing or the amount that will be paid to providers of service. Please note that the existence of a code for a procedure does not guarantee coverage or payment. Where reimbursement is sought for use of a product that may be inconsistent with, or not expressly specified in, the FDA cleared or approved labeling (e.g., instructions for use, operator's manual or package insert), consult with your billing advisors or payers on handling such billing issues. Some payers may have policies that make it inappropriate to submit claims for such items or related service.
