

CardioGRAFT[®]

Pulmonary Artery Conduit (non-valved)

Clinical Overview CardioGraft Pulmonary Artery Conduit is a cryopreserved human pulmonary artery with excised leaflets for pulmonary reconstruction.

- Applications**
- Tetralogy of Fallot
 - Pulmonary Atresia
 - Truncus Arteriosus
 - Transposition of the Great Arteries

- Features & Benefits**
- **Human Tissue:** Closely resembles autograft; compliant, flexible, easy to handle and suture.
 - **Resistant to Infection:** Natural ability to resist infection.^{1,2,3}
 - **Convenient:** Availability in various sizes to best fit the patient's anatomy.
 - **Reduced Thrombosis Potential:** Alleviates the need for anticoagulation therapy.^{3,4}

CardioGraft Pulmonary Artery Conduit (non-valved)

Cryopreserved Storage (-120°C and Below), 7 Year Shelf Life

Description	Diameter	Order Code
Small	less than or equal to 16 mm	PAS
Medium	17 to 21 mm	PAM
Large	greater than or equal to 22 mm	PAL

Fragile. Store at liquid nitrogen (LN₂) vapor phase temperature (-120°C and below) and carefully follow the thaw and dilution instructions.

Instructions for use available at [LifeNetHealth.org/IFU](https://www.lifenethealth.org/IFU)
