

FlexiGRAFT®

Demineralized Fibers

Clinical Overview

FlexiGraft Demineralized Fibers offer excellent handling properties without the need of a carrier. These Fibers are engineered to maintain their osteoinductive potential and osteoconductive properties, while providing surgeons the operative flexibility to customize hydrating options to fit patient's needs

Applications

- Any surgical application that requires bone void filler

Why Use

- **Osteoconductive:** The increased surface area of demineralized cortical fibers provides an optimal scaffold for cellular attachment and proliferation
- **Osteoinductive Potential:** The cortical fibers are demineralized using LifeNet Health's patented and proprietary PAD technology. This technology carefully exposes natural growth factors trapped within cortical bone while maintaining its inherent osteoinductive potential
- **No Carrier:** Contains no fillers or carriers commonly used in bone putties and gels
- **Customizable Hydration:** Allows surgeons to customize hydration options to fit patient's needs by the following hydration options:
 - Platelet Rich Plasma (PRP)
 - Bone Marrow Aspirate (BMA)
 - Whole Blood
 - Saline
 - Antibiotic Solution
- **Biocompatible:** FlexiGraft Demineralized Fibers are comprised of 100% natural bone matrix which is remodeled naturally during the bone healing process
- **Sterile:** Pre-Sutured Lateral Ankle Tendon is sterilized using proprietary and patented Allowash XG® technology. This provides a sterility assurance level (SAL) of 10^{-6} , without compromising the construct's inherent biomechanical properties

Demineralized Fibers

Freeze-dried Storage/3 year shelf life

Volume	Order Code
1.0 cc	BL-1000-001
2.5 cc	BL-1000-002
5.0 cc	BL-1000-003
10.0 cc	BL-1000-004

68-60-024-01.02
