

MatriGRAFT[®]

Femoral Heads & Humeral Head

Clinical Overview

Femoral and humeral heads, designed to provide immediate structural support to restore segmental bone loss or to be ground into cortical/cancellous chips

Applications

- Joint Arthroplasty
 - Fracture Management
 - Creating Custom Wedges or Segments
 - Filling Osseous Defects
-

Features & Benefits

- **Osteoconductive:** Natural bone matrix facilitates cell attachment and proliferation, and vascular in-growth
 - **Structural:** Cortical wall provides immediate structural support
 - **100% Human Bone:** Can remodel with a patient's own tissue during the healing process
 - **Sterile:** Sterilized using patented and proprietary Allowash XG[®] technology which provides a sterility assurance level (SAL) of 10^{-6} , without compromising the graft's inherent osteoconductive properties¹
 - **Convenient:** Implant is pre-sized to fit a variety of applications and minimize prep time in the operating room
-

FFH, FFHG and FHH

FFHN

MatriGraft Femoral Heads & Humeral Head

Store between -40°C and -80°C/5 Year Shelf Life

Description	Order Code
Femoral Head	FFH
Femoral Head with Neck Neck Length: 10 - 12 mm	FFHN
Femoral Head for Grinding	FFHG
Humeral Head	FHH

Diameter: 43 mm or greater

Instructions for use available at LifeNetHealth.org/IFU
