ReadiGRAFT BLX®

Sponge

Clinical Overview

Compressible cancellous bone matrix that has been demineralized to encourage bone formation and healing.

Applications

Surgical procedures that require bone void filler

Features & Benefits

- **Compressible:** After re-hydration, graft can be compressed to fit tight spaces and, upon implantation, will expand to fill the surgical site.
- **Bioactive:** Demineralized to expose natural growth factors with osteoinductive potential.
- **Osteoconductive:** Natural bone matrix facilitates cell attachment and proliferation.[1]
- **Sterile:** Sterilized using proprietary Allowash XG® technology, providing a sterility assurance level of 10^{-6} to reduce the risk of disease transmission without compromising the graft's osteoconductive properties or osteoinductive potential.[2]
- **100% Bone:** No dilution of bone content.
- **Absorbent:** Absorbs and retains bioactive fluids like blood, platelet rich plasma (PRP), and bone marrow aspirate (BMA).
- **Versatile:** Available as strips, cubes, or chips in multiple sizes and volumes to meet surgical needs.
- **Convenient**: Ambient storage and rapid rehydration.

ReadiGraft BLX Sponge Strip

Ambient Storage*/5 Year Shelf Life

Size (mm)	Order Code
10 x 20 x 2	OSS3001
15 x 40 x 2	OSS3002
20 x 50 x 2	OSS3003
20 x 25 x 6	OSS3004
15 x 20 x 6	OSS3005
10 x 20 x 8	OSS3006

ReadiGraft BLX Sponge Chips

(1-8 mm grind)

Ambient Storage*/5 Year Shelf Life

Volume	Order Code
2.5 cc	OSF2000
5 cc	OSF2001
10 cc	OSF2002

ReadiGraft BLX Sponge Cube

Ambient Storage*/5 Year Shelf Life

Volume	Order Code
8 x 8 x 8	OSC1003
10 x 10 x 10	OSC1000
12 x 12 x 12	OSC1001
14 x 14 x 14	OSC1002

*While ambient room temperature has not been defined by regulatory bodies, LifeNet Health would recommend storage at 2°C to 37°C with excursions of less than 24 hours up to 40°C. If an excursion outside this range occurs, please contact LifeNet Health.

Instructions for use available at **LifeNetHealth.org/IFU**
