

Programs

Workplace Partnerships

The purpose of the Workplace Partnership program is to build "partnerships" with businesses and organizations throughout Virginia and West Virginia to educate their employees or members about the critical need for organ and tissue donation and to encourage people to sign up on DonateLifeVirginia.org [1] or <https://donatelifewv.gov> [2].

Recycle Your Life Teen Donation Program

This education package is designed for teachers to provide their students with basic information on organ, eye and tissue donation and to encourage them to discuss this important topic with their family and friends.

College Outreach

To educate and engage college students on the importance of organ and tissue donation.

Faith-Based Community

To educate the faith-based community about the importance of making an informed decision about organ and tissue donation and promote registrations on DonateLifeVirginia.org [3] or <https://donatelifewv.gov> [2]. Educating the clergy, so they are able to address donation questions from their congregation, is another key focus.

DMV Ambassador

To have direct and consistent contact with DMV customer service representatives essentially allowing us to reach out to each and every Virginian to increase donor designation sign-ups throughout the commonwealth.

Interested in becoming a donation advocate? [Click here](#) [4] to volunteer!
