

Bio-Implants for Sports Medicine Procedures

Ligaments, tendons, and bone allografts are frequently used in knee and shoulder applications. Our allograft bioimplants are clinically proven in a variety of surgical applications. As a result, we are the world's most trusted provider of transplant solutions, allograft bio-implants, and cellular therapies. Since 1995, more than 6 million tissue grafts have been distributed with no disease transmission using Allowash XG[®] technology.

Note: Not all bio-implants are available for distribution in every country.

Description

FlexiGRAFT® Cancellous Bone Plug, available frozen or preservon

- Available in diameters 6 – 11 mm and length can be trimmed to properly back-fill donor recovery site
- Comprised of 100% human bone which is remodeled naturally during the bone healing process
- Created to precisely fit the recovery site created when using the Arthrex® OATS® system
- Offered in Preservon®, a proprietary glycerol-based preservation technology that allows allograft bioimplants to be stored in a fully hydrated state at ambient temperature
- LifeNet Health's proprietary and patented Allowash XG® provides a sterility assurance level of 10⁻⁶

Clinical Application

- To be used for back-fill OATS® autologous implant procedures

Frozen	Description	Size
FCPD7	Cancellous Plug w/ Cartilage	D = 7 mm

FCPD8 Cancellous Plug w/ Cartilage D = 8 mm

FCPD9	Cancellous Plug w/ Cartilage	D = 9 mm
-------	------------------------------	----------

FCPD10 Cancellous Plug w/ Cartilage D = 10 mm

FCPD11	Cancellous Plug w/ Cartilage	D = 11 mm
--------	------------------------------	-----------

Preservon	Description	Size
PCPD6	Cancellous Plug w/o Cartilage	D = 6 mm

PCPD7 Cancellous Plug w/o Cartilage D = 7 mm

Preservon	Description	Size
PCPD8	Cancellous Plug w/o Cartilage	D = 8 mm
PCPD9	Cancellous Plug w/o Cartilage	D = 9 mm
PCPD10	Cancellous Plug w/o Cartilage	D = 10 mm
PCPD11	Cancellous Plug w/o Cartilage	D = 11 mm
