#### Medicare Payment for Product Purchased for Specific Patient:

Matrion is not included in the ASP Medicare Part B Drug Pricing File that is published quarterly. CMS instructions indicate that payment allowance limits for drugs and biologicals that are not included in the ASP File are based on the published wholesale acquisition cost (WAC) or invoice price. The payment limit is either 103 or 106 percent of the lesser of the lowest priced brand or median generic WAC.

Physician/QHP offices should verify if the Medicare Administrative Contractor (MAC) that processes their claims, covers Matrion and whether the MAC pays for it based on WAC or invoice price.

- If the MAC pays for Matrion based on WAC, the following information should be included in field 19 of a paper claim or in the narrative field of an electronic claim:

<sup>1</sup> CPT 2021 Professional Edition, 2020 American Medical Association (AMA); CPT is a trademark of the AMA

<sup>2</sup> Total RVU (Relative Value Unit) – Total includes work RVU, Practice Expense RVU and Malpractice RVU.

The information presented here is current as of December 2020 and is based upon publicly available source information. Codes and values are subject to frequent change without notice. The entity billing Medicare and/or third-party payers is solely responsible for the accuracy of the codes assigned to the services or items in the medical record. When making coding decisions, we encourage you to seek input from the AMA, relevant medical societies, CMS, your local Medicare Administrative Contractor, and other health plans to which you submit claims. Items and services that are billed to payers must be medically necessary and supported by appropriate documentation. It is important to remember that while a code may exist describing certain procedures and/or technologies, it does not guarantee coverage and payment by payers.*
