

FlexiGRAFT®

Cancellous Plugs

Clinical Overview

FlexiGraft Cancellous Plugs are sterile plugs of 100% cancellous bone for use in backfilling OATS® procedures

Applications

- Used to back-fill donor sites created during an osteochondral autograft transfer system (OATS) procedures
- Trephine arthrodesis of tarsal-metatarsal joint
- Other procedures/bone voids that require a small diameter bone

Why Use

- **Versatile:** FlexiGraft Cancellous Plugs are available in diameters 6 11 mm and length can be trimmed to properly back-fill autograft recovery site
- **Biocompatible:** FlexiGraft Cancellous Plugs are comprised of 100% human bone, which is remodeled naturally during the bone healing process
- Fully Hydrated, Ambient Storage Available: FlexiGraft Cancellous Plugs are also offered in Preservon®, a proprietary glycerol-based preservation technology that allows allograft bio-implants to be stored in a fully hydrated state at ambient temperature. Preservon eliminates lengthy thawing and rehydrating times and does not require freezer storage
- **Sterile:** FlexiGraft Cancellous Plugs are sterilized using proprietary and patented Allowash XG® technology. This provides a sterility assurance level of 10⁻⁶ without compromising the graft's inherent biomechanical properties

FlexiGraft Cancellous Plugs with non-viable cartilage

Set length of 16 mm Frozen Storage (-40°C to -80°C)/5 year shelf life

Frozen	Diameter
FCPD7	7 mm
FCPD8	8 mm
FCPD9	9 mm
FCPD10	10 mm
FCPD11	11 mm

FlexiGraft Cancellous Plugs without cartilage

Set length of 16 mm Ambient Storage (2°C to 30°C, excursions to 40°C)/5 year shelf life

Preservon	Diameter
PCPD6	6 mm
PCPD7	7 mm
PCPD8	8 mm
PCPD9	9 mm
PCPD10	10 mm
PCPD11	11 mm
