

Costal Cartilage

Clinical Overview

Costal Cartilage is sterile (10-6) hyaline cartilage from the rib. Cleaned and sterilized using the patented Allowash XG® technology, this grafts biomechanical and biochemical properties are maintained, making it ideal for nasal and ear reconstruction

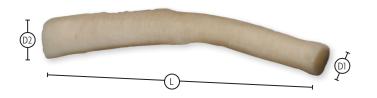

Applications

- Nasal Reconstruction
- Ear Reconstruction

Why Use

- **Sterile:** Sterilized using proprietary and patented Allowash XG technology. This technology provides a sterility assurance level of 10⁻⁶, without compromising the grafts inherent properties
- **Biocompatible:** Costal Cartilage is compromised of 100% hyaline cartilage that is remodeled naturally during the healing process
- **Supportive:** Provides biomechanical strength requirements for intended use
- Convenient: Allows physician to select appropriate graft for clinical procedure
- Malleable: Easy to trim and shape to perfectly fit surgical need

Costal Cartilage Size Length Preservation Method Order Code L: 30 - 59 mm; D1: ≥ 7 mm; D2: ≥ 7 mm 30 - 59 mm Frozen CCART30 L: 60 - 90 mm; D1: ≥ 7 mm; D2: ≥ 7 mm 60 - 90 mm Frozen CCART60
