

ReadiGRAFT BLX[®]

DBM Fibers

Clinical Overview A proprietary mix of demineralized cortical fibers and mineralized cancellous chips engineered to encourage bone formation and healing.

Applications Surgical procedures that require a bone void filler

- Features & Benefits**
- **Malleable:** Conforms to the surgical site.
 - **Osteoconductive:** Large surface area and interconnected network of demineralized cortical fibers provides a scaffold that promotes cellular attachment and cell spreading.^{1,2}
 - **Osteoinductive Potential:** Demonstrated presence of new bone elements in an athymic rodent model.²
 - **100% Bone:** No dilution of bone content.
 - **Customizable:** Easily mixes with autograft, allograft and/or fluid of surgeon's choice.
 - **Sterile:** Sterilized using proprietary Allowash XG[®] technology, providing a sterility assurance level of 10⁻⁶ to reduce the risk of disease transmission without compromising the graft's osteoconductive properties or osteoinductive potential.³

Readigraft BLX DBM Fibers

*Ambient Storage

Volume	Order Code	Shelf Life
2.0 cc	DF-1002	3 Years
5.0 cc	DF-1003	3 Years
10.0 cc	DF-1006	5 Years
15.0 cc	DF-1004	5 Years
30.0 cc	DF-1005	5 Years

*While ambient room temperature has not been defined by regulatory bodies, LifeNet Health would recommend storage at 2°C to 37°C with excursions of less than 24 hours up to 40°C. If an excursion outside this range occurs, please contact LifeNet Health.

Instructions for use available at [LifeNetHealth.org/IFU](https://www.lifenethealth.org/IFU)
