

Costal Cartilage

Clinical Overview

Costal Cartilage is sterile hyaline cartilage from the rib. Cleaned and sterilized using the patented Allowash XG® technology, this graft's biomechanical and biochemical properties are maintained, making it ideal for nasal and ear reconstruction.

Applications

- Nasal Reconstruction
 - Ear Reconstruction
-

Features & Benefits

- **Sterile:** Sterilized using proprietary and patented Allowash XG technology. This technology provides a sterility assurance level of 10^{-6} , without compromising the grafts inherent properties.
 - **Biocompatible:** Costal Cartilage is comprised of 100% hyaline cartilage that is remodeled naturally during the healing process.
 - **Supportive:** Provides biomechanical strength requirements for intended use.
 - **Convenient:** Allows physician to select appropriate graft for clinical procedure.
 - **Malleable:** Easy to trim and shape to perfectly fit surgical need.
-

Costal Cartilage

Frozen Storage (-40°C to -80°C)/5 Year Shelf Life

Size	Length	Order Code
L: 30 - 59 mm; D1: \geq 7 mm; D2: \geq 7 mm	30 - 59 mm	CCART30
L: 60 - 90 mm; D1: \geq 7 mm; D2: \geq 7 mm	60 - 90 mm	CCART60
