

## FREQUENTLY ASKED QUESTIONS

### Do LifeNet Health Products Contain Recombinant Proteins or Synthetic Peptides?

LifeNet Health does not offer any product that contains recombinant proteins or synthetic peptides. All of our products are allograft bio-implants that are processed from donated human tissue. We recover, process, store, and distribute all donated human tissue in accordance with 21 CFR Part 1271 Human Cells, Tissues, and Cellular and Tissue Based Products and the Standards for Tissue Banking set forth by the American Association of Tissue Banks. Our allograft bio-implants are safe and effective alternatives for products that contain recombinant proteins or synthetic peptides.
