# Readigraft® BLX

## **Fibers**

ReadiGRAFT BLX Fibers are a proprietary mix of demineralized cortical fibers and mineralized cancellous chips specifically engineered to maintain the osteoinductive the graft while providing surgeons with the

### Brand

ReadiGraft BLX Fibers

### Clinical **Applications**

And Benefits

Any surgical application that requires bone void filler

- Osteoconductive: The natural osteoconductive porous architecture of cancellous bone and the increased surface area of demineralized cortical fibers provides a scaffold for cellular attachment and proliferation.
- Osteoinductive Potential: The cortical fibers are demineralized using LifeNet Health's patented and proprietary PAD technology. This technology carefully exposes natural growth factors trapped within cortical bone while maintaining its inherent osteoinductive potential.
- No Carrier: Contains no fillers or carriers commonly used in bone putties and gels.

## **Features**

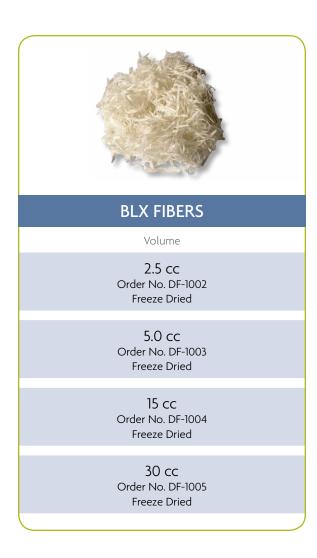

- Customizable Hydration: Allows surgeons to customize hydration options to fit patient's needs by the following hydration options:
  - Platelet Rich Plasma (PRP)
- Bone Marrow Aspirate (BMA)
- Whole Blood
- Saline
- Antibiotic Solution
- **Biocompatible:** ReadiGraft BLX Fibers are comprised of 100% natural bone matrix which is remodeled naturally during the bone healing process.
- Sterile: Sterilized using proprietary and patented Allowash XG technology. This technology provides a sterility assurance level of 10<sup>-6</sup>, without compromising the implant's inherent osteoconductivity or osteoinductive potential.
