

MatriGRAFT[®]

Calcaneus Cross Section & Calcaneus Wedge

Clinical Overview

Dense cancellous bio-implants with intact cortical plate, designed to provide immediate structural support and restore segmental bone loss

Applications

- Calcaneal Osteotomies
- Fracture Management
- Foot & Ankle Fusion
- Subtalar Joint Fusion

Why Use

- **Osteoconductive:** Natural bone matrix facilitates cell attachment and proliferation, and vascular in-growth
- **Structural:** Cortical plate provides immediate structural support
- **100% Human Bone:** Will remodel alongside patient's own tissue during the healing process
- **Pre-Hydrated:** Allograft bio-implants featuring Preservon are stored in a fully-hydrated state at ambient temperatures. Preservon eliminates thawing and re-hydration time and does not require freezer storage or compromise the graft's inherent osteoconductive properties¹
- **Sterile:** Sterilized using patented and proprietary Allowash XG technology which provides a sterility assurance level (SAL) of 10⁻⁶, without compromising the graft's inherent osteoconductive properties²
- **Convenient:** Implant is pre-sized to fit a variety of applications and minimize prep time in the operating room

MatriGraft Calcanus Cross Sections

Thickness (mm)	Preservon
8	FA-1000-001
10	FA-1000-002
12	FA-1000-003

Length: 20 mm or Greater

MatriGraft Calcanus Wedge

Height (mm)	Freeze-Dried
15	POD.WEDGE
18	POD.WEDGE8

Thickness: 20 - 28 mm, recorded in increments of 2 mm
30 mm or > produced upon special request

Length: Small = 25 - 27 mm

Medium = 28 - 30 mm

Large = 31 - 35 mm

36 mm or > produced upon special request
