MatriGRAFT®
Femoral Heads & Humeral Head

Clinical Overview
Femoral and humeral heads, designed to provide immediate structural support to restore segmental bone loss or to be ground into cortical/cancellous chips

Applications
- Joint Arthroplasty
- Fracture Management
- Creating Custom Wedges or Segments
- Filling Osseous Defects

Why Use
- Osteoconductive: Natural bone matrix facilitates cell attachment and proliferation, and vascular in-growth
- Structural: Cortical wall provides immediate structural support
- 100% Human Bone: Can remodel with a patient’s own tissue during the healing process
- Sterile: Sterilized using patented and proprietary Allowash XG® technology which provides a sterility assurance level (SAL) of 10^-6, without compromising the graft’s inherent osteoconductive properties
- Convenient: Implant is pre-sized to fit a variety of applications and minimize prep time in the operating room
