FlexiGRAFT®

Cancellous Plugs

FlexiGRAFT Cancellous Plugs are sterile plugs of 100% cancellous bone for use in backfilling OATS® procedures.

Brand	<ul style="list-style-type: none"> FlexiGRAFT®
Clinical Applications	<ul style="list-style-type: none"> Used to back-fill donor sites created during an osteochondral autograft transfer system (OATS) procedures Trephine arthrodesis of tarsal-metatarsal joint Other procedures/bone voids that require a small diameter bone
Features And Benefits	<ul style="list-style-type: none"> Versatile – FlexiGRAFT Cancellous plugs are available in diameters 6 – 11 mm and length can be trimmed to properly back-fill donor recovery site Biocompatible – FlexiGRAFT Cancellous plugs are comprised of 100% human bone which is remodeled naturally during the bone healing process Compatible – When used in conjunction with the Arthrex OATS Harvester, the graft should be 1 mm larger than the harvester used to provide a line-to-line fit in the donor site. (8 mm Harvester = 9 mm allograft plug) Refer to OATS Backfill Plugs Brochure from Arthrex Convenience – Created to precisely fit the recovery site created when using the Arthrex OATS system Fully Hydrated, Ambient Storage Available – FlexiGRAFT Cancellous plugs are also offered in Preservon®, a proprietary glycerol-based preservation technology that allows allograft bio-implants to be stored in a fully hydrated state at ambient temperature. Preservon eliminates lengthy thawing and rehydrating times, and does not require freezer storage Sterile – FlexiGRAFT Cancellous plugs are sterilized using proprietary and patented Allowash XG technology. This provides a sterility assurance level of 10⁻⁶, without compromising the graft's inherent biomechanical properties
Alternative Products	<ul style="list-style-type: none"> Cloward dowels (Frozen or Preservon) Demineralized Fibers (Freeze-dried) Demineralized Sponge (Freeze-dried)

FlexiGRAFT®

Cancellous Plugs

Frozen Cancellous Plug with non-viable cartilage Set length of 16mm	
FCPD7	7 mm diameter
